

Anglo/Brazilian
Northern Mato Grosso Expedition 1967/69

FLORA OF MATO GROSSO

No. R. 26

Bredmeyeria altissima (Benth.) Klotzsch ex
Hassk.

1 km. South of Xarantina (52°20'W-14°44'S)

Edge of man-made clearing in dense
cerrado formation.

Shrub c. 4.5 m. tall but slender-stemmed and
height is due to scrambling on adjacent small tree
(a nearby specimen has self-supporting shoots to c. 4 m).
Wing sepals pale cream, keel petal pale yellow.
Flowers visited by a very large wasp.

Date: 3.7.1967

Coll.: J.A. RATTER

Det.: TDP.
