

FLORA OF BRAZIL

Federal District

No. R2895

Podrancia neasoliana (Tanf.) Sprague

In the area of the Corrego Cabeça  
de Veado, c. 9.5 km SSE of Brasília  
TV Tower. Vernac. name: Lake Loguas

Woody liana. Vernac. name (= 7 leagues) refers  
to its habit of spreading from tree to tree  
& thus covering great areas.

Corolla pale pink outside; cream with  
dark red honey guides within. Calyx  
greenish cream.

Cultivated on the verandah of a house  
but apparently native.

Date. 16.4.1976

Coll.: J A Ratter
