

FLORA OF BRAZIL

Federal District

No. R.6674

Miconia sellowiana Naud.

IBGE, Reserva do Roncador, margin of the
Mato do Taquara, c. 15°57'S 47°53'W.

Growing in the edge of a gallery forest.

Bushy tree, 3 m tall, 7 cm dbh, leaning
out from the marginal wall of the forest.
Ripe fruits pale green with dark green to
brownish black vertical stripes - rather
like some type of gourd; almost
tasteless.

Date: 13 11 1991
