

FLORA OF BRAZIL

State of Bahia

No. R. 8027

*Dimorphandra gardneriana* Tul.

Vernacular name: Faveira

2km from Riachão das Neves on the road to Barreiras, 11°46'S 44°54'W, alt. 640m.

In low mesotrophic cerrado.

Wide-crowned tree, 4m tall, 12cm dbh. Bark scaling and fissured into a pattern of deep oblong-ovoid blocks; it has been part stripped by someone who has mistaken it for *Stryphnodendron* ('barbatimão').

Date: 24 vii 1998

Coll.: J.A. Ratter, S. Bridgewater & J. Batista dos Santos.
