

FLORA OF BRAZIL

Vochys.

State of Mato Grosso

No. R. 8090

*Qualea wittrockii* Malme

Vernacular name: Cangerana preta

Matinha, c. 70km S of Riberão Cascalheira on the road to Nova Xavantina (BR158), 13°31'S 51°54'W.

Boggy streamside with sparse gallery forest.

Twin-trunked tree, 7m tall; thicker trunk 15cm dbh. Bark whitish with vertically elongated lenticels somewhat like those of 'landim' (*Calophyllum brasiliense*). Spur sepal waxy white above, flecked with green and pink; spur itself dull pinky green. Other sepals small, greenish. Petal waxy white with yellow-flecked honey-guide down centre. Filament stout, white with greenish anthers. Style white.

Date: 19 viii 1998

Coll: J.A. Ratter, S. Bridgewater, J. Fonsêca Filho & Edson de Lima. (E, K, UB)
