

FLORA OF BRAZIL

State of Goiás

No. R8174V

Myrcia mutabilis O. Berg
Myrtaceae

Det. C. Proença ii 2001

Uruaçu, 14°29'S 49°09'W, alt. 550m.

In dense cerradão, previously cut-over and with much coppice regeneration.

Bushy tree, 4m tall, many trunked from the base (coppice regeneration). Bark fawn with a shallow, vertical network of fissures, rather like that of a lilac tree (*Syringa*).

Date: 19 iv 1999

Coll.: J. A. Ratter, S. Bridgewater & J. Fonsêca Filho.
