

FLORA OF BRAZIL

Hyfferode

State of Mato Grosso

No. R8277

Salacia crassifolia (Mart.) Peyr. or *elliptica* G.

Don

Vernacular name: Bacupari

129km from Cáceres on the road to Cuiabá,
15°50'S 56°50'W.

In low cerrado.

Tree, 5m tall, 12cm dbh, with thick corky grey bark in irregular deep furrows and flutes.

Flowers marzipan brown. There seems to be a continuous variation between *S. crassifolia* and *elliptica*.

Date: 24 viii 1999
