

FLORA OF BRAZIL

State of Mato Grosso

No. R. 4744

Jacaranda brasiliana (Lam.) Pers.

c. 6km from Xavantina ($14^{\circ}45'S$ $52^{\circ}20'W$)
on the road to Bom Jardim de Goiás.

Amongst quartzite rocks on a hill
('Butterfly Hill').

Tree, 6m tall, 20cm d.b.h. Bark silver,
scaling. Corollas white with some pale
rose below, pale rose in bud.

This appears to be a colour form. All
the other trees of the population have
blue-violet flowers.

Date. 29.8.1982
